

VT Momentum Diversified Moderate Fund (A)

30 September 2025

For professional advisors only

Investment objective & strategy

The VT Momentum Diversified Moderate Fund aims to deliver a real return for investors over the medium to long term of CPI +5% net of fees, with anticipated volatility in the range of 8-11%. The Fund aims to operate within the 'low medium' risk profile as defined by Distribution Technology, the independent fund rating agency. The Fund will invest across a range of asset classes using third party investment funds, and is classified in the IA Mixed Investment 40-85% Shares sector. The minimum investment horizon for the Fund should be thought of as six years.

Ten year historical cumulative performance

Sources: Morningstar, Momentum Global Investment Management (MGIM). Fund performance is calculated on a total return basis, net of all fees and in GBP terms. The value of the underlying funds and the income generated from them can go down as well as up, and is not guaranteed. Investors may not get back the original amount invested. The value of investments involving exposure to foreign currencies can be affected by currency exchange rate fluctuations. Past performance is not a guide to future performance.

Monthly commentary

- Global markets extended their Q3 rally in September, supported by resilient economic data, dovish central bank signals, and continued strength in AI-related sectors. Global developed equities returned 3.6% for the month, led by US megacap tech stocks, with the S&P 500 up 4% and the Magnificent Seven gaining 7.2%. Japan and China also delivered strong gains amid stimulus measures and surging AI revenues.
- The largest contributions to returns came from specialist assets, particularly private equity and property. Gold was another key contributor, surging 12.3% to all-time highs, driven by safe-haven demand amid geopolitical tensions and debt concerns.
- Fixed income delivered modest gains as UK gilts advanced 0.7%, while emerging market debt and investment grade credit also performed well.
- Within private equity, Schroders Capital Global Innovation Trust (INOV) was a notable contributor following strong half-year results. The trust reported a 7.4% increase in NAV per share, driven by the upward revaluation of Araris Biotech.
- Within property, PRS REIT returned over 11% after announcing non-binding heads of terms to sell its operating subsidiary for £646.2 million in cash to a fund advised by Waypoint Asset Management. We reduced exposure following the strong share price reaction.
- We introduced Primary Health Properties (PHP) during the month, a leading UK and Irish healthcare REIT offering attractive inflation-linked rental income and defensive characteristics. The sector is underpinned by strong demographic trends and government policy shifting care from hospitals to community-based Neighbourhood Health Centres. PHP's government-backed income and long leases provide resilience, with minimal vacancy risk. Its recent merger with Assura enhances liquidity, scale and cost synergies, positioning the enlarged group for improved operational efficiency and potential re-rating as integration progresses.
