Sources: Morningstar, Momentum Global Investment Management (MGIM). Fund performance is calculated on a total return basis, net of all fees and in GBP terms. The value of the underlying funds and the income generated from them can go down as well as up, and is not guaranteed. Investors may not get back the original amount invested. The value of investments involving exposure to foreign currencies can be affected by currency exchange rate fluctuations. Past performance is not a guide to future performance.

MONTHLY COMMENTARY

- Global equity markets extended their gains in June, supported by falling inflation expectations and growing anticipation of interest rate cuts later in the year. Despite persistent geopolitical risks, investor sentiment improved across both developed and emerging markets.
- The largest contributions to returns over the month came from our specialist assets allocation, where private equity holdings were particularly strong. Syncona rose following the announcement that the company plans to revise its investment objective and policy to focus on the orderly realisation of its life sciences portfolio, which was well received by the market. Schroders Capital Global Innovation also rallied sharply after launching a tender offer to return £37m of capital to shareholders, more than the £30m initially indicated. The offer, which represents a return of around 21% of the company's share capital, is expected to complete in late July.
- Within infrastructure, Foresight Environmental Infrastructure was another key contributor. The company reported improved financials, including a reduced loss before tax, stronger cash flows and a higher interim dividend. Digital 9 Infrastructure also contributed positively following the sale of its SeaEdge data centre asset. Proceeds will be used to repay debt and cancel its revolving credit facility.
- Within developed market equities, UK smaller companies performed strongly, particularly the Fund's exposure to Aberforth UK Smaller Companies. Elsewhere, the Lyrical Global Value Equity Strategy also contributed positively. Emerging markets saw broad-based gains and were another positive contributor.
- We initiated a new position in the SDCL Energy Efficiency Income Trust which invests in infrastructure projects that aim to deliver decentralised, energy-efficient solutions directly to users – helping to reduce energy waste and cut costs. While the trust has come under pressure due to elevated debt levels and widening discount to NAV, we believe the market has been overly pessimistic. Management has outlined a clear plan to reduce gearing through asset sales and improve capital discipline, and we see scope for a rerating as the strategy is executed.
